

Eight Point Wind Energy Center

About Eight Point Wind Energy Center

- Located in two towns in Steuben County, N.Y. on land leased from owners
- 101.8 MW operating capacity
- 31 wind turbines
- Expected to generate enough clean electricity to power 43,000 homes
- Operated by a subsidiary of NextEra Energy Resources
- Facilities will include wind turbines, access roads, buried and overhead electric collection lines, a project collection substation, meteorological towers, an operation and maintenance building, and electrical interconnection facilities.

An Experienced Partner

With a nearly 30-year track record of safely building and operating wind energy centers, NextEra Energy Resources is **the right partner** for Steuben County.

NextEra Energy Resources understands how to safely construct and maintain wind energy centers in a way that properly protects the environment and community. Consider:

NextEra Energy Resources:

- Owns and operates 110 wind farms in the United States and Canada.
- World's largest generator of renewable energy from the wind and sun as of year-end 2015.
- Operates two power plants in New York and continues to develop new wind and transmission projects in the State.
- Expertise to address concerns and develop appropriate strategies that minimize effects on wildlife. Furthermore, the company uses modern technology that mitigates noise issues for neighbors.

About NextEra Energy Resources

- A leading clean energy provider operating wind, natural gas, solar and nuclear power plants
- A portfolio of generating assets across the United States and in Canada
- The largest wind generator in North America
- A subsidiary of NextEra Energy, Inc., with headquarters in Juno Beach, Florida
- More than 95 percent of our electricity comes from clean or renewable sources
