

Eight Point Wind Energy Center

About Eight Point Wind Energy Center

- Located in two towns in Steuben County, N.Y. on land leased from owners
- 101.8 MW operating capacity
- 31 wind turbines
- Expected to generate enough clean electricity to power 43,000 homes
- Operated by a subsidiary of NextEra Energy Resources
- Facilities will include wind turbines, access roads, buried and overhead electric collection lines, a project collection substation, meteorological towers, an operation and maintenance building, and electrical interconnection facilities.

Steuben County – A Leader in Renewable Energy

Eight Point Wind will strengthen Steuben County's position as a leader in renewable energy and help New York meet its renewable energy goals.

The project is expected to produce enough clean, renewable energy electricity to power up to more than 43,000 New York homes, build on Steuben County's proven track record of wind energy success, and position the county as leaders in wind energy.

New York's clean energy goals are expanding and this wind energy center will help the state meet higher standards. Governor Cuomo recently announced that New York should produce half of its total power from renewable sources by 2030 and projects like this will help meet that need.

This new source of clean, renewable power produces no air or water pollution and is in line with the state's Reforming the Energy Vision (REV) initiative, which is fostering new opportunities for renewable power and new wind generation that will help New York transform its energy generation system.

About NextEra Energy Resources

- A leading clean energy provider operating wind, natural gas, solar and nuclear power plants
- A portfolio of generating assets across the United States and in Canada
- The largest wind generator in North America
- A subsidiary of NextEra Energy, Inc., with headquarters in Juno Beach, Florida
- More than 95 percent of our electricity comes from clean or renewable sources
